WEB DEVELOPMENT INTERNSHIP PROGRAM

TASK # 1 – PROFESSIONAL PERSONAL PORTFOLIO WEBSITE

Submitted By: Aliyan Ahmad

Internship Domain: Web Development

Task Number: Task # 1

Live Demo: <https://aliyan-portfolio.tiiny.site>

GitHub Repository: <https://github.com/codebyaliyan/personal-portfolio>

Submission Date: August ,10, 2026

OBJECTIVE

Designed and developed a modern, professional, and fully responsive personal portfolio website using **HTML5** and **CSS3**.

This website show case my personal profile, technical skills, education, projects, and contact information through a clean and attractive web interface.

USED TECHNOLOGIES

- ✓ HTML5 → Semantic markup, accessibility, structure
 - ✓ CSS3 → Custom properties, Grid, Flexbox, Animations
 - ✓ Font Awesome 6 → Professional Icons
 - ✓ Google Fonts → Inter font family
 - ✓ Web3Forms API → Serverless form handling, email delivery
-

WEBSITE STRUCTURE

- ✓ **Introduction:** "Hello, I'm Aliyan Ahmad"
- ✓ **Name with animated gradient effect**
- ✓ **Tagline:** "Code, Coffee and Crushing Bugs..."
- ✓ **Profile photo with animated border** (floating effect)
- ✓ **Floating badges:** "8+ Projects" and "Top 1%"
- ✓ **Call-to-action buttons:** "View My Work" and "Let's Talk"
- ✓ **Animated scroll indicator**

2. ABOUT

- ✓ Personal introduction and background
- ✓ Academic background: BS Computer Science (NSU Islamabad)
- ✓ Career interests: Architecture, DevOps, DSA
- ✓ Statistics: 1+ Years, 8+ Projects, 100% Responsible
- ✓ Visual elements: Icon boxes with animations

3. SKILLS

✓ 7 skill cards with animated progress bars

✓ Java (92%), C++ (85%), C (80%)

✓ Python (65%), MySQL (55%)

✓ HTML (90%), Git & GitHub (78%)

✓ Staggered entrance animations

✓ Hover effects with scale and glow

4. EDUCATION

✓ BS Computer Science (NSU Islamabad)

→ 4 years program

→ Coursework: Data Structures, Web Development, DBMS, AI

✓ HackerRank Java Certification (2025)

→ Core Java, OOP, Data Structures

5. PROJECTS (3 Projects)

✓ Java Chat Application

→ Real-time CLI chat using Sockets & Multithreading

→ **Technologies:** Java, Sockets, Multi-threading

✓ Weather Forecast App

→ Live weather data using APIs

→ **Technologies:** Java, APIs, JSON

✓ Tic-Tac-Toe

→ Terminal-based OOP game

→ **Technologies:** Java, OOP

6. CONTACT

✓ **Email:** codewithaliyan01@gmail.com

✓ **Phone:** +923359572906

✓ **Location:** D.I.Khan, Pakistan

✓ **Social links:** GitHub, LinkedIn, Twitter

✓ Contact form with CSS validation

7. FOOTER

✓ Copyright information

✓ Quick navigation links

✓ Social media links

WEBSITE FEATURES

1. Responsive Design

✓ Works on Desktop, Laptop, Tablet, and Mobile

✓ No horizontal scrolling

✓ Content adapts to all screen sizes

2. Navigation Bar

- ✓ Fixed position with glassmorphism effect
- ✓ Links: About, Skills, Education, Projects, Contact
- ✓ Dark/Light mode toggle
- ✓ Hamburger menu for mobile devices

3. Hero Section

- ✓ Professional introduction with animated name
- ✓ Profile image with floating border animation
- ✓ Floating badges (8+ Projects, Top 1%)
- ✓ Call-to-action buttons
- ✓ Animated scroll indicator

4. Skills Cards

- ✓ 7 skill cards with progress bars
- ✓ Animated entrance with staggered delays
- ✓ Hover effects: Scale up, glow, and border highlight

5. Project Cards

- ✓ 3 project cards with images
- ✓ Hover overlay with GitHub and Live Demo links
- ✓ 3D tilt effect on hover
- ✓ Tags for technologies used

6. Contact Form

Functional Contact Form → Powered by Web3Forms API (no backend required)

- ✓ Professional form with floating labels
- ✓ CSS validation (:valid/:invalid states)
- ✓ Visual feedback icons
- ✓ Send button with icon

7. Footer

- ✓ Copyright information
- ✓ Quick navigation links
- ✓ Social media links

8. Animations & Interactions

- ✓ Smooth scrolling between sections
- ✓ Hover effects on buttons, cards, links, and icons
- ✓ Scroll progress indicator (bottom right)
- ✓ Staggered card entrance animations
- ✓ Floating animations on hero image and badges
- ✓ 3D tilt on project cards

9. Accessibility

- ✓ Semantic HTML elements
- ✓ ARIA labels for screen readers

✓ Keyboard navigation support

✓ Proper heading hierarchy

10. Code Organization

✓ BEM methodology for class naming

✓ Clean, properly formatted code

✓ Meaningful class and ID names

✓ Separate files for HTML, CSS, and assets

CONCLUSION

By completing this task, I have understood the fundamentals of creating a professional website using:

➤ Serverless Integration:

- Web3Forms API allows form submissions without a backend
- Understanding of API integration and form handling

HTML5 → CSS3 → Layouts → Responsive Design → Navigation → Animations → UI Design → GitHub

GITHUB REPOSITORY & LINKS

GitHub Repository: <https://github.com/codebyaliyan/personal-portfolio>

Repository Contents:

- ✓ index.html (Main HTML file)
 - ✓ style.css (All CSS styles)
 - ✓ README.md (Project documentation)
 - ✓ images/ (Profile photo and project images)
 - ✓ Documentation.pdf (This report)
